# NSURLCredentialStorage Class Reference

Inherits from NSObject

Conforms to NSObject (NSObject)

Framework /System/Library/Frameworks/Foundation.framework

Availability Available in Mac OS X v10.2 with Safari 1.0 installed.

Available in Mac OS X v10.2.7 and later.

Companion guide URL Loading System

**Declared in** NSURLCredentialStorage.h

## Overview

NSURLCredentialStorage implements a singleton (shared object) that manages the credential storage.

# **Tasks**

# **Getting the Credential Storage**

+ sharedCredentialStorage (page 6)

Returns the shared URL credential storage object.

# **Getting and Setting Default Credentials**

```
defaultCredentialForProtectionSpace: (page 7)
```

Returns the default credential for the specified protectionSpace.

- setDefaultCredential:forProtectionSpace: (page 9)

Sets the default credential for a specified protection space.

# **Adding and Removing Credentials**

- removeCredential:forProtectionSpace: (page 8)

Removes a specified credential from the credential storage for the specified protection space.

- setCredential:forProtectionSpace: (page 8)

Adds credential to the credential storage for the specified protectionSpace.

## **Retrieving Credentials**

- allCredentials (page 6)

Returns a dictionary containing the credentials for all available protection spaces.

- credentialsForProtectionSpace: (page 7)

Returns a dictionary containing the credentials for the specified protection space.

## Class Methods

## sharedCredentialStorage

Returns the shared URL credential storage object.

+ (NSURLCredentialStorage \*)sharedCredentialStorage

#### **Return Value**

The shared NSURLCredentialStorage object.

#### **Availability**

Available in Mac OS X v10.2 with Safari 1.0 installed.

Available in Mac OS X v10.2.7 and later.

#### **Declared In**

NSURLCredentialStorage.h

# **Instance Methods**

#### allCredentials

Returns a dictionary containing the credentials for all available protection spaces.

- (NSDictionary \*)allCredentials

#### **Return Value**

A dictionary containing the credentials for all available protection spaces. The dictionary has keys corresponding to the NSURLProtectionSpace objects. The values for the NSURLProtectionSpace keys consist of dictionaries where the keys are user name strings, and the value is the corresponding NSURLCredential object.

#### **Availability**

Available in Mac OS X v10.2 with Safari 1.0 installed.

Available in Mac OS X v10.2.7 and later.

#### See Also

- credentialsForProtectionSpace: (page 7)

#### **Declared In**

NSURLCredentialStorage.h

## credentialsForProtectionSpace:

Returns a dictionary containing the credentials for the specified protection space.

 (NSDictionary \*)credentialsForProtectionSpace:(NSURLProtectionSpace \*)protectionSpace

#### **Parameters**

protectionSpace

The protection space whose credentials you want to retrieve.

#### Return Value

A dictionary containing the credentials for *protectionSpace*. The dictionary's keys are user name strings, and the value is the corresponding NSURLCredential.

#### **Availability**

Available in Mac OS X v10.2 with Safari 1.0 installed.

Available in Mac OS X v10.2.7 and later.

#### See Also

- allCredentials (page 6)

#### **Declared In**

NSURLCredentialStorage.h

# defaultCredentialForProtectionSpace:

Returns the default credential for the specified protectionSpace.

(NSURLCredential \*)defaultCredentialForProtectionSpace:(NSURLProtectionSpace \*)protectionSpace

#### **Parameters**

protectionSpace

The URL protection space of interest.

#### **Return Value**

The default credential for protectionSpace or nil if no default has been set.

#### **Availability**

Available in Mac OS X v10.2 with Safari 1.0 installed.

Available in Mac OS X v10.2.7 and later.

#### See Also

- setDefaultCredential:forProtectionSpace: (page 9)

Instance Methods 7

#### **Declared In**

NSURLCredentialStorage.h

## removeCredential:forProtectionSpace:

Removes a specified credential from the credential storage for the specified protection space.

- (void)removeCredential:(NSURLCredential \*)credential
forProtectionSpace:(NSURLProtectionSpace \*)protectionSpace

#### **Parameters**

credential

The credential to remove.

protectionSpace

The protection space from which to remove the credential.

#### **Availability**

Available in Mac OS X v10.2 with Safari 1.0 installed.

Available in Mac OS X v10.2.7 and later.

#### See Also

- setCredential:forProtectionSpace: (page 8)

#### **Declared In**

NSURLCredentialStorage.h

### setCredential:forProtectionSpace:

Adds credential to the credential storage for the specified protectionSpace.

```
- (void)setCredential:(NSURLCredential *)credential
forProtectionSpace:(NSURLProtectionSpace *)protectionSpace
```

#### **Parameters**

credential

The credential to add. If a credential with the same user name already exists in protectionSpace, then credential replaces the existing object.

protectionSpace

The protection space to which to add the credential.

#### **Availability**

Available in Mac OS X v10.2 with Safari 1.0 installed.

Available in Mac OS X v10.2.7 and later.

#### See Also

```
- removeCredential:forProtectionSpace: (page 8)
```

#### Declared In

NSURLCredentialStorage.h

## setDefaultCredential:forProtectionSpace:

Sets the default credential for a specified protection space.

- (void)setDefaultCredential:(NSURLCredential \*)credential
forProtectionSpace:(NSURLProtectionSpace \*)protectionSpace

#### **Parameters**

credential

The URL credential to set as the default for protectionSpace. If the receiver does not contain credential in the specified protectionSpace it will be added.

protectionSpace

The protection space whose default credential is being set.

#### **Availability**

Available in Mac OS X v10.2 with Safari 1.0 installed.

Available in Mac OS X v10.2.7 and later.

#### See Also

- defaultCredentialForProtectionSpace: (page 7)

#### Declared In

NSURLCredentialStorage.h

# **Notifications**

#### NSURLCredentialStorageChangedNotification

This notification is posted when the set of stored credentials changes.

The notification object is the NSURLCredentialStorage instance. This notification does not contain a userInfo dictionary.

#### **Availability**

Available in Mac OS X v10.2 with Safari 1.0 installed.

Available in Mac OS X v10.2.7 and later.

#### **Declared In**

NSURLCredentialStorage.h

# **Document Revision History**

This table describes the changes to NSURLCredentialStorage Class Reference.

Date	Notes
2006-05-23	Expanded description of defaultCredentialForProtectionSpace:.
	First publication of this content as a separate document.
