# Introduction to Preference Panes Reference Update

---

This document summarizes the symbols that have been added to the Preference Panes framework. The full reference documentation notes in what version a symbol was introduced, but sometimes it's useful to see only the new symbols for a given release.

If you are not familiar with this framework you should refer to the complete framework reference documentation.

## Organization of This Document

Symbols are grouped by class or protocol for Objective-C and by header file for C. For each symbol there is a link to complete documentation, if available, and a brief description, if available.

## See Also

For reference documentation on this framework, see *Preference Panes Framework Reference*.

# 10.3 Symbol Changes

---

This article lists the symbols added to `PreferencePanels.framework` in Mac OS X v10.3.

## Classes

All of the classes with new symbols are listed alphabetically, with their new class, instance, and delegate methods described.

### NSPreferencePane

---

Complete reference information is available in the [NSPreferencePane reference](#).

#### Instance Methods

---

<code>isSelected</code>	Returns YES if the receiver is currently selected by the user, otherwise NO.
<code>updateHelpMenuWithArray:</code>	Call this method if you need to update help menu items dynamically.

## C Symbols

All of the header files with new symbols are listed alphabetically, with their new symbols described.

### NSPreferencePane.h

---

#### Data Types & Constants

---

All of the new data types and constants in this header file are listed alphabetically, with links to documentation and abstracts, if available.

<code>kNSPrefPaneHelpMenuAnchorKey</code>	Key for the anchor reference for <code>AHLookupAnchor</code> in the dictionary supplied as an argument to <code>updateHelpMenuWithArray:</code>
<code>kNSPrefPaneHelpMenuInfoPListKey</code>	

<code>kNSPrefPaneHelpMenuItemKey</code>	Key for the localized help menu item in the dictionary supplied as an argument to <code>updateHelpMenuWithArray:</code>
---	---

# 10.2 Symbol Changes

---

This article lists the symbols added to `PreferencePanels.framework` in Mac OS X v10.2.

## Classes

All of the classes with new symbols are listed alphabetically, with their new class, instance, and delegate methods described.

### NSPreferencePane

---

Complete reference information is available in the [NSPreferencePane reference](#).

### Instance Methods

---

<code>autoSaveTextFields</code>	If this method returns YES, text fields are forced to give up their responder status before <code>shouldUnselect</code> is called on the preference pane.
---------------------------------	---

# 10.1 Symbol Changes

---

This article lists the symbols added to `PreferencePanels.framework` in Mac OS X v10.1.

## Classes

All of the classes with new symbols are listed alphabetically, with their new class, instance, and delegate methods described.

### NSPreferencePane (New)

---

Complete reference information is available in the [NSPreferencePane reference](#).

#### Instance Methods

---

<code>assignMainView</code>	Locates and assigns the receiver's main view from the nib file loaded by <code>loadMainView</code> .
<code>bundle</code>	Returns the <code>NSBundle</code> instance representing the preference pane's bundle.
<code>didSelect</code>	Notifies the receiver that the main application has just displayed the preference pane's main view.
<code>didUnselect</code>	Notifies the receiver that the main application has just stopped displaying the preference pane's main view.
<code>firstKeyView</code>	Returns the first view in the keyboard focus chain.
<code>initialKeyView</code>	Returns the view that should have the keyboard focus when the pane is selected.
<code>initWithBundle:</code>	Initializes the receiver with the preference pane's bundle, returning <code>self</code> .
<code>lastKeyView</code>	Returns the last view in the keyboard focus chain.
<code>loadMainView</code>	Loads the receiver's user interface into its main view.
<code>mainNibName</code>	Returns the name of the preference pane's nib file.
<code>mainView</code>	Returns the main view of the preference pane.

<code>mainViewDidLoad</code>	Notifies the receiver that the main view is set up and prepared to be displayed.
<code>replyToShouldUnselect:</code>	Notifies the main application of the receiver's willingness (or unwillingness) to be deselected.
<code>setFirstKeyView:</code>	Sets the first view in the keyboard focus chain.
<code>setInitialKeyView:</code>	Sets the view that should have keyboard focus when the pane is selected.
<code>setLastKeyView:</code>	Sets the last view in the keyboard focus chain.
<code>setMainView:</code>	Sets the main view of the preference pane.
<code>shouldUnselect</code>	Returns a value indicating whether the receiver is willing to be deselected.
<code>willSelect</code>	Notifies the receiver that the main application is about to display the preference pane's main view.
<code>willUnselect</code>	Notifies the receiver that the main application is about to stop displaying the preference pane's main view.

## C Symbols

All of the header files with new symbols are listed alphabetically, with their new symbols described.

### NSPreferencePane.h

---

#### Data Types & Constants

---

All of the new data types and constants in this header file are listed alphabetically, with links to documentation and abstracts, if available.

<code>NSPreferencePaneCancelUnselectNotification</code>	Notifies the main application that the preference pane is not willing to be deselected.
<code>NSPreferencePaneDoUnselectNotification</code>	Notifies the main application that the preference pane is willing to be deselected.
<code>NSPreferencePaneUnselectReply</code>	
<code>NSUnselectCancel</code>	Cancel the deselection
<code>NSUnselectLater</code>	Delay the deselection until the preference pane invokes <code>replyToShouldUnselect:</code>
<code>NSUnselectNow</code>	Continue the deselection

# Document Revision History

---

This table describes the changes to *Preference Panes Reference Update*.

Date	Notes
2007-07-18	New document that summarizes the symbols added to the Preference Panes framework in Mac OS X v10.5.
