WebDocumentText Protocol Reference

Conforms to NSObject

Framework /System/Library/Frameworks/WebKit.framework **Availability** Available in Mac OS X v10.2 with Safari 1.0 and later.

Available in Mac OS X v10.2.7 and later.

Companion guide WebKit Objective-C Programming Guide

Declared in WebDocument.h

Overview

WebDocumentText is an optional protocol for document view objects that display text. This protocol defines methods for accessing document content as strings, and methods for text selection. Classes that adopt this protocol should also adopt WebDocumentView and inherit from NSView.

Tasks

Getting Document Content

- string (page 8)

Returns the entire content of the web document as a string.

- attributedString (page 6)

Returns the entire content of the web document as an attributed string.

Selecting and Deselecting Text

selectAll (page 7)

Selects all the text in the web document.

- deselectAll (page 6)

Deselects the currently selected text in the web document.

selectedString (page 7)

Returns the currently selected text in the web document as a string.

- selectedAttributedString (page 7)

Returns the currently selected text in the web document as an attributed string.

Text Encoding

- supportsTextEncoding (page 8)

Returns a Boolean value that indicates whether the web document supports text encoding.

Instance Methods

attributedString

Returns the entire content of the web document as an attributed string.

- (NSAttributedString *)attributedString

Return Value

An attributed string containing the entire content of the web document.

Availability

Available in Mac OS X v10.2 with Safari 1.0 and later.

Available in Mac OS X v10.2.7 and later.

See Also

- string (page 8)

Declared In

WebDocument.h

deselectAll

Deselects the currently selected text in the web document.

- (void)deselectAll

Availability

Available in Mac OS X v10.2 with Safari 1.0 and later.

Available in Mac OS X v10.2.7 and later.

See Also

- selectAll (page 7)

Declared In

WebDocument.h

selectAll

Selects all the text in the web document.

- (void)selectAll

Availability

Available in Mac OS X v10.2 with Safari 1.0 and later.

Available in Mac OS X v10.2.7 and later.

See Also

- deselectAll (page 6)

Declared In

WebDocument.h

selectedAttributedString

Returns the currently selected text in the web document as an attributed string.

- (NSAttributedString *)selectedAttributedString

Return Value

An attributed string containing the currently selected text in the web document.

Availability

Available in Mac OS X v10.2 with Safari 1.0 and later.

Available in Mac OS X v10.2.7 and later.

See Also

- selectedString (page 7)

Declared In

WebDocument.h

selectedString

Returns the currently selected text in the web document as a string.

- (NSString *)selectedString

Return Value

The currently selected text in the web document.

Availability

Available in Mac OS X v10.2 with Safari 1.0 and later.

Available in Mac OS X v10.2.7 and later.

See Also

selectedAttributedString (page 7)

Declared In

WebDocument.h

string

Returns the entire content of the web document as a string.

- (NSString *)string

Return Value

The entire content of the web document.

Availability

Available in Mac OS X v10.2 with Safari 1.0 and later.

Available in Mac OS X v10.2.7 and later.

See Also

- attributedString (page 6)

Declared In

WebDocument.h

supportsTextEncoding

Returns a Boolean value that indicates whether the web document supports text encoding.

- (BOOL)supportsTextEncoding

Return Value

YES if the web document supports text encoding; otherwise, NO.

Availability

Available in Mac OS X v10.2 with Safari 1.0 and later.

Available in Mac OS X v10.2.7 and later.

Declared In

WebDocument.h

Document Revision History

This table describes the changes to WebDocumentText Protocol Reference.

Date	Notes
2009-03-04	Added separate parameter and return-value descriptions.
2006-05-23	First publication of this content as a separate document.
