PDFThumbnailView Class Reference

Inherits from	NSView : NSResponder : NSObject
Conforms to	NSCoding NSAnimatablePropertyContainer (NSView) NSCoding (NSResponder) NSObject (NSObject)
Framework	Library/Frameworks/Quartz.framework/Frameworks/PDFKit.framework
Availability	Available in Mac OS X v10.5 and later.
Declared in	PDFThumbnailView.h

Overview

A `PDFThumbnailView` object contains a set of thumbnails, each of which represents a page in a PDF document.

Tasks

Accessing the Associated PDF View

- [PDFView](#) (page 8)
Returns the `PDFView` object associated with the thumbnail view.
- [setPDFView:](#) (page 11)
Associates the specified `PDFView` object with the thumbnail view.

Managing the Size of a Thumbnail View

- [thumbnailSize](#) (page 12)
Returns the maximum width and height of the thumbnails in the thumbnail view.
- [setThumbnailSize:](#) (page 11)
Sets the maximum width and height of the thumbnails in the thumbnail view.

Working with Thumbnail View Display Characteristics

- [maximumNumberOfColumns](#) (page 8)
Returns the maximum number of columns of thumbnails the thumbnail view can display.
- [setMaximumNumberOfColumns:](#) (page 11)
Sets the maximum number of columns of thumbnails the thumbnail view can display.
- [labelFont](#) (page 8)
Returns the font used to label the thumbnails.
- [setLabelFont:](#) (page 10)
Sets the font used to label the thumbnails.
- [backgroundColor](#) (page 7)
Returns the color used in the background of the thumbnail view.
- [setBackground-color:](#) (page 10)
Sets the color used in the background of the thumbnail view.

Managing the Behavior of a Thumbnail View

- [allowsDragging](#) (page 6)
Returns a Boolean value indicating whether users can drag thumbnails (that is, re-order pages in the document) within the thumbnail view.
- [setAllowsDragging:](#) (page 9)
Sets whether users can drag thumbnails within the thumbnail view; that is, re-order pages in the document.
- [allowsMultipleSelection](#) (page 7)
Returns a Boolean value indicating whether users can select multiple thumbnails in the thumbnail view at one time.
- [setAllowsMultipleSelection:](#) (page 9)
Sets whether the thumbnail view allows users to select more than one thumbnail at a time.
- [selectedPages](#) (page 9)
Returns an array of PDF pages that correspond to the selected thumbnails in the thumbnail view.

Instance Methods

allowsDragging

Returns a Boolean value indicating whether users can drag thumbnails (that is, re-order pages in the document) within the thumbnail view.

- (BOOL)allowsDragging

Return Value

YES if users can re-order pages by dragging thumbnails, NO otherwise.

Availability

Available in Mac OS X v10.5 and later.

See Also

- [setAllowsDragging](#): (page 9)

Declared In

PDFThumbnailView.h

allowsMultipleSelection

Returns a Boolean value indicating whether users can select multiple thumbnails in the thumbnail view at one time.

- (BOOL)allowsMultipleSelection

Return Value

YES if users can select multiple thumbnails simultaneously, NO otherwise.

Discussion

By default, `PDFThumbnailView` allows only a single thumbnail to be selected at one time. When this is the case, you can get the PDF page that corresponds to the selected thumbnail using the `PDFView` method `currentPage`.

When multiple selections are enabled, however, you must use [selectedPages](#) (page 9) to get the pages that correspond to the set of selected thumbnails.

Availability

Available in Mac OS X v10.5 and later.

See Also

- [setAllowsMultipleSelection](#): (page 9)

- [selectedPages](#) (page 9)

Declared In

PDFThumbnailView.h

backgroundColor

Returns the color used in the background of the thumbnail view.

- (NSColor *)backgroundColor

Return Value

The color of the background in the thumbnail view.

Availability

Available in Mac OS X v10.5 and later.

See Also

- [setBackground-color](#): (page 10)

Declared In

PDFThumbnailView.h

labelFont

Returns the font used to label the thumbnails.

- (NSFont *)labelFont

Return Value

The font used in the thumbnail labels.

Discussion

Typically, the label of a thumbnail is the page number of the page it represents.

Availability

Available in Mac OS X v10.5 and later.

See Also

- [setLabelFont:](#) (page 10)

Declared In

PDFThumbnailView.h

maximumNumberOfColumns

Returns the maximum number of columns of thumbnails the thumbnail view can display.

- (NSInteger)maximumNumberOfColumns

Return Value

The maximum number of columns of thumbnails the thumbnail view can display. If 0, the thumbnail displays as many columns of thumbnails as fit in its size.

Availability

Available in Mac OS X v10.5 and later.

See Also

- [setThumbnailSize:](#) (page 11)

Declared In

PDFThumbnailView.h

PDFView

Returns the PDFView object associated with the thumbnail view.

- (PDFView *)PDFView

Return Value

The PDF view object associated with the thumbnail view.

Availability

Available in Mac OS X v10.5 and later.

See Also

- [setPDFView:](#) (page 11)

Declared In

PDFThumbnailView.h

selectedPages

Returns an array of PDF pages that correspond to the selected thumbnails in the thumbnail view.

- (NSArray *)selectedPages

Return Value

An array of PDF pages that correspond to the thumbnails selected in the thumbnail view.

Discussion

If the thumbnail view allows multiple selections (if [allowsMultipleSelection](#) (page 7) returns YES), you can use this method to get the PDF pages that correspond to the selected thumbnails.

Availability

Available in Mac OS X v10.5 and later.

See Also

- [allowsMultipleSelection](#) (page 7)
- [setAllowsDragging:](#) (page 9)

Declared In

PDFThumbnailView.h

setAllowsDragging:

Sets whether users can drag thumbnails within the thumbnail view; that is, re-order pages in the document.

- (void)setAllowsDragging:(BOOL)allow

Parameters

allow

Pass YES to allow users to drag thumbnails in the thumbnail view (this allows them to re-order pages in the document), or NO to disallow.

Availability

Available in Mac OS X v10.5 and later.

See Also

- [allowsDragging](#) (page 6)

Declared In

PDFThumbnailView.h

setAllowsMultipleSelection:

Sets whether the thumbnail view allows users to select more than one thumbnail at a time.

- (void)setAllowsMultipleSelection:(BOOL)flag

Parameters*flag*

Pass YES to allows users to select multiple thumbnails at one time, or NO to disallow.

Discussion

By default, `PDFThumbnailView` allows only a single thumbnail to be selected at one time. When this is the case, you can get the PDF page that corresponds to the selected thumbnail using the `PDFView` method `currentPage`.

If you use `setAllowsMultipleSelection` to enable multiple selections, however, you must use [selectedPages](#) (page 9) to get the pages that correspond to the set of selected thumbnails.

Availability

Available in Mac OS X v10.5 and later.

See Also

- [allowsMultipleSelection](#) (page 7)
- [selectedPages](#) (page 9)

Declared In

`PDFThumbnailView.h`

setBackground-color:

Sets the color used in the background of the thumbnail view.

```
- (void)setBackgroundColor:(NSColor *)color
```

Parameters*color*

The color to be used in the background of the thumbnail view.

Availability

Available in Mac OS X v10.5 and later.

See Also

- [backgroundColor](#) (page 7)

Declared In

`PDFThumbnailView.h`

setLabelFont:

Sets the font used to label the thumbnails.

```
- (void)setLabelFont:(NSFont *)font
```

Parameters*font*

The font to be used in the thumbnail labels.

Discussion

Typically, the label of a thumbnail is the page number of the page it represents.

Availability

Available in Mac OS X v10.5 and later.

See Also

- [LabelFont](#) (page 8)

Declared In

PDFThumbnailView.h

setMaximumNumberOfColumns:

Sets the maximum number of columns of thumbnails the thumbnail view can display.

```
(void)setMaximumNumberOfColumns:(NSInteger)maxColumns
```

Parameters

maxColumns

The maximum number of columns of thumbnails the thumbnail view can display. Pass 0 to make the thumbnail view display as many columns as fit in its size.

Availability

Available in Mac OS X v10.5 and later.

See Also

- [thumbnailSize](#) (page 12)

Declared In

PDFThumbnailView.h

setPDFView:

Associates the specified `PDFView` object with the thumbnail view.

```
(void)setPDFView:(PDFView *)view
```

Parameters

view

The PDF view object to associate with the thumbnail view.

Availability

Available in Mac OS X v10.5 and later.

See Also

- [PDFView](#) (page 8)

Declared In

PDFThumbnailView.h

setThumbnailSize:

Sets the maximum width and height of the thumbnails in the thumbnail view.

- (void)setThumbnailSize:(NSSize)*size*

Parameters

size

The maximum width and height the thumbnails in the thumbnail view should be.

Availability

Available in Mac OS X v10.5 and later.

See Also

- [thumbnailSize](#) (page 12)

Declared In

PDFThumbnailView.h

thumbnailSize

Returns the maximum width and height of the thumbnails in the thumbnail view.

- (NSSize)thumbnailSize

Return Value

The maximum width and height of the thumbnails in the thumbnail view.

Availability

Available in Mac OS X v10.5 and later.

See Also

- [setThumbnailSize:](#) (page 11)

Declared In

PDFThumbnailView.h

Document Revision History

This table describes the changes to *PDFThumbnailView Class Reference*.

Date	Notes
2007-12-11	Made minor corrections.
2007-10-31	New document that describes the class that represents the thumbnail view in a PDF document.
