NSCoder QTKit Additions Reference

Inherits from	NSObject
Conforms to	NSObject (NSObject)
Framework	/System/Library/Frameworks/QTKit.framework
Availability	Available in Mac OS X v10.4 and later.
Declared in	QTTime.h QTTimeRange.h

Overview

The QuickTime Kit supports categories on the `NSCoder` class that allow you to encode and decode structures of type `QTTime` and `QTTimeRange`, in addition to structures of type `SMPTETime` in Mac OS X v10.5.

Tasks

Encoding Time and Time Ranges

- [encodeQTTime:forKey:](#) (page 6)
Encodes a `QTTime` structure.
- [encodeQTTimeRange:forKey:](#) (page 7)
Encodes a `QTTimeRange` structure range.
- [encodeSMPTETime:forKey:](#) (page 7)
Encodes an `SMPTETime` for the given key.

Decoding Time and Time Ranges

- [decodeQTTimeForKey:](#) (page 6)
Decodes a `QTTime` structure.
- [decodeQTTimeRangeForKey:](#) (page 6)
Decodes a `QTTimeRange` structure.
- [decodeSMPTETimeForKey:](#) (page 6)
Decodes an `SMPTETime` structure encoded by the receiver for the given key.

Instance Methods

decodeQTTimeForKey:

Decodes a QTTime structure.

```
- (QTTime)decodeQTTimeForKey:(NSString *)key
```

Discussion

This method matches an encode QTTime message used during encoding.

Availability

Available in Mac OS X v10.3 and later.

Declared In

QTTime.h

decodeQTTimeRangeForKey:

Decodes a QTTimeRange structure.

```
- (QTTimeRange)decodeQTTimeRangeForKey:(NSString *)key
```

Discussion

This method matches an encode QTTimeRange message used during encoding.

Availability

Available in Mac OS X v10.3 and later.

Declared In

QTTimeRange.h

decodeSMPTETimeForKey:

Decodes an SMPTETime structure encoded by the receiver for the given key.

```
- (SMPTETime)decodeSMPTETimeForKey:(NSString *)key
```

Availability

Mac OS X v10.5 and later.

Declared In

QTTime.h

encodeQTTime:forKey:

Encodes a QTTime structure.

```
- (void)encodeQTTime:(QTTime)timeforKey
:(NSString *)key
```

Discussion

This method must be matched by a decode `QTime` message.

Availability

Available in Mac OS X v10.3 and later.

Declared In

`QTime.h`

encodeQTimeRange:forKey:

Encodes a `QTimeRange` structure range.

```
- (void)encodeQTimeRange:(QTimeRange)rangeforKey  
    :(NSString *)key
```

Discussion

This method must be matched by a decode `QTimeRange` message.

Availability

Available in Mac OS X v10.3 and later.

Declared In

`QTimeRange.h`

encodeSMPTETime:forKey:

Encodes an `SMPTETime` for the given key.

```
- (void)encodeSMPTETime:(SMPTETime)time  
    forKey:(NSString *)key
```

Availability

Mac OS X v10.5 and later.

Declared In

`QTime.h`

Document Revision History

This table describes the changes to *NSCoder QTKit Additions Reference*.

Date	Notes
2007-05-07	Updated for Mac OS X v10.5, with new SMPTETime methods.
