# QTMedia Class Reference

---

<b>Inherits from</b>	NSObject
<b>Conforms to</b>	NSObject (NSObject)
<b>Framework</b>	/System/Library/Frameworks/QTKit.framework
<b>Availability</b>	Available in Mac OS X v10.4 and later.
<b>Declared in</b>	QTMedia.h
<b>Related sample code</b>	QTKitTimeCode QTMetadataEditor

## Overview

The `QTMedia` class represents a QuickTime media (of type `Media`). `QTMedia` objects are associated with `QTTrack` objects and support methods for getting and setting the media properties. If necessary, you can retrieve the media identifier associated with a `QTMedia` object by calling its `quickTimeMedia` (page 8) method.

## Tasks

### Creating a QTMedia Object

- + `mediaWithQuickTimeMedia:error:` (page 6)  
Creates a new `QTMedia` object with QuickTime media data.

### Initializing a QTMedia Object

- `initWithQuickTimeMedia:error:` (page 7)  
Initializes a new `QTMedia` object with QuickTime media data.

### Accessing Media Properties

- `track` (page 9)  
Returns the `QTTrack` object that contains the media.

- [hasCharacteristic:](#) (page 7)  
Returns whether the media has the specified characteristic.
- [attributeForKey:](#) (page 7)  
Returns the value of the specified media attribute.
- [setAttribute:forKey:](#) (page 9)  
Sets the value of the specified media attribute.
- [mediaAttributes](#) (page 8)  
Returns a dictionary containing all of the media's attributes.
- [setMediaAttributes:](#) (page 9)  
Sets the media's attributes using the values from the supplied dictionary.

## Accessing QuickTime Media Data

- [quickTimeMedia](#) (page 8)  
Returns the QuickTime media associated with the media object.

## Class Methods

### **mediaWithQuickTimeMedia:error:**

Creates a new QTMedia object with QuickTime media data.

```
+ (id)mediaWithQuickTimeMedia:(Media)media error:(NSError **)errorPtr
```

#### **Parameters**

*media*

The QuickTime media data with which to initialize the media object.

*errorPtr*

On return, if the media object could not be created, a pointer to an error indicating the reason for the failure.

#### **Return Value**

The newly created media object.

#### **Availability**

Available in Mac OS X v10.3 and later.

Not available to 64-bit applications.

#### **Declared In**

QTMedia.h

## Instance Methods

### **attributeForKey:**

Returns the value of the specified media attribute.

```
- (id)attributeForKey:(NSString *)attributeKey
```

#### **Parameters**

*attributeKey*

The key for the desired attribute. Possible attribute keys are listed in [“Media Attributes”](#) (page 13).

#### **Return Value**

The value of the specified attribute.

#### **Availability**

Available in Mac OS X v10.3 and later.

#### **See Also**

- [setAttribute:forKey:](#) (page 9)

#### **Related Sample Code**

QTMetadataEditor

#### **Declared In**

QTMedia.h

### **hasCharacteristic:**

Returns whether the media has the specified characteristic.

```
- (BOOL)hasCharacteristic:(NSString *)characteristic
```

#### **Parameters**

*characteristic*

The characteristic being tested. Possible characteristics are listed in [“Media Characteristics”](#) (page 12).

#### **Return Value**

YES if the media has the specified characteristic, NO otherwise.

#### **Availability**

Available in Mac OS X v10.3 and later.

#### **Declared In**

QTMedia.h

### **initWithQuickTimeMedia:error:**

Initializes a new QTMedia object with QuickTime media data.

```
- (id)initWithQuickTimeMedia:(Media)media error:(NSError **)errorPtr
```

### Parameters

*media*

The QuickTime media data with which to initialize the media object.

*errorPtr*

On return, if the media object could not be created, a pointer to an error indicating the reason for the failure.

### Return Value

The newly initialized media object.

### Availability

Available in Mac OS X v10.3 and later.

Not available to 64-bit applications.

### Declared In

QTMedia.h

## mediaAttributes

Returns a dictionary containing all of the media's attributes.

- (NSDictionary \*)mediaAttributes

### Return Value

A dictionary containing all of the media's attributes.

### Discussion

Possible attribute keys are listed in [“Media Attributes”](#) (page 13).

### Availability

Available in Mac OS X v10.3 and later.

### See Also

- [setMediaAttributes:](#) (page 9)

### Declared In

QTMedia.h

## quickTimeMedia

Returns the QuickTime media associated with the media object.

- (Media)quickTimeMedia

### Return Value

The QuickTime media associated with the media object.

### Availability

Available in Mac OS X v10.3 and later.

Not available to 64-bit applications.

### Declared In

QTMedia.h

## setAttribute:forKey:

Sets the value of the specified media attribute.

```
- (void)setAttribute:(id)value forKey:(NSString *)attributeKey
```

### Parameters

*value*

The new value for the specified attribute.

*attributeKey*

The key for the attribute to set. Possible attribute keys are listed in [“Media Attributes”](#) (page 13).

### Availability

Available in Mac OS X v10.3 and later.

### See Also

- [attributeForKey:](#) (page 7)

### Declared In

QTMedia.h

## setMediaAttributes:

Sets the media’s attributes using the values from the supplied dictionary.

```
- (void)setMediaAttributes:(NSDictionary *)attributes
```

### Parameters

*attributes*

A dictionary containing the new attribute keys and values.

### Discussion

Possible attribute keys are listed in [“Media Attributes”](#) (page 13).

### Availability

Available in Mac OS X v10.3 and later.

### See Also

- [mediaAttributes](#) (page 8)

### Declared In

QTMedia.h

## track

Returns the QTTrack object that contains the media.

```
- (QTTrack *)track
```

### Return Value

The QTTrack object that contains the media.

### Availability

Available in Mac OS X v10.3 and later.

**Declared In**  
 QTMedia.h

## Constants

### Media Types

Constants for different media types. Compare these constants with the value associated with the `QTMediaTypeAttribute` key.

```
NSString * const QTMediaTypeVideo;
NSString * const QTMediaTypeSound;
NSString * const QTMediaTypeText;
NSString * const QTMediaTypeBase;
NSString * const QTMediaTypeMPEG;
NSString * const QTMediaTypeMusic;
NSString * const QTMediaTypeTimeCode;
NSString * const QTMediaTypeSprite;
NSString * const QTMediaTypeFlash;
NSString * const QTMediaTypeMovie;
NSString * const QTMediaTypeTween;
NSString * const QTMediaType3D;
NSString * const QTMediaTypeSkin;
NSString * const QTMediaTypeQTVR;
NSString * const QTMediaTypeHint;
NSString * const QTMediaTypeStream;
NSString * const QTMediaTypeMuxed;
NSString * const QTMediaTypeQuartzComposer;
```

#### Constants

`QTMediaTypeVideo`

**Video media.**

Available in Mac OS X v10.3 and later.

Declared in `QTMedia.h`.

`QTMediaTypeSound`

**Sound media.**

Available in Mac OS X v10.3 and later.

Declared in `QTMedia.h`.

`QTMediaTypeText`

**Text media.**

Available in Mac OS X v10.3 and later.

Declared in `QTMedia.h`.

`QTMediaTypeBase`

**Base media.**

Available in Mac OS X v10.3 and later.

Declared in `QTMedia.h`.

- QTMediaTypeMPEG  
MPEG media.  
Available in Mac OS X v10.3 and later.  
Declared in QTMedia.h.
- QTMediaTypeMusic  
Music media.  
Available in Mac OS X v10.3 and later.  
Declared in QTMedia.h.
- QTMediaTypeTimeCode  
Timecode media.  
Available in Mac OS X v10.3 and later.  
Declared in QTMedia.h.
- QTMediaTypeSprite  
Sprite media.  
Available in Mac OS X v10.3 and later.  
Declared in QTMedia.h.
- QTMediaTypeFlash  
Flash media.  
Available in Mac OS X v10.3 and later.  
Declared in QTMedia.h.
- QTMediaTypeMovie  
Movie media.  
Available in Mac OS X v10.3 and later.  
Declared in QTMedia.h.
- QTMediaTypeTween  
Tween media.  
Available in Mac OS X v10.3 and later.  
Declared in QTMedia.h.
- QTMediaType3D  
3D media.  
Available in Mac OS X v10.3 and later.  
Declared in QTMedia.h.
- QTMediaTypeSkin  
Skin media  
Available in Mac OS X v10.3 and later.  
Declared in QTMedia.h.
- QTMediaTypeQTVR  
QuickTime VR media.  
Available in Mac OS X v10.3 and later.  
Declared in QTMedia.h.

QTMediaTypeHint

Hint media.

Available in Mac OS X v10.3 and later.

Declared in `QTMedia.h`.

QTMediaTypeStream

Stream media.

Available in Mac OS X v10.3 and later.

Declared in `QTMedia.h`.

QTMediaTypeMuxed

Multiplexed audio and video media.

Available in Mac OS X v10.5 and later.

Declared in `QTMedia.h`.

QTMediaTypeQuartzComposer

Quartz Composer media.

Available in Mac OS X v10.5 and later.

Declared in `QTMedia.h`.

## Media Characteristics

Characteristics of a given media. You can query for these characteristics using the `hasCharacteristic:` (page 7) method.

```
NSString * const QTMediaCharacteristicVisual;
NSString * const QTMediaCharacteristicAudio;
NSString * const QTMediaCharacteristicCanSendVideo;
NSString * const QTMediaCharacteristicProvidesActions;
NSString * const QTMediaCharacteristicNonLinear;
NSString * const QTMediaCharacteristicCanStep;
NSString * const QTMediaCharacteristicHasNoDuration;
NSString * const QTMediaCharacteristicHasSkinData;
NSString * const QTMediaCharacteristicProvidesKeyFocus;
NSString * const QTMediaCharacteristicHasVideoFrameRate;
```

### Constants

QTMediaCharacteristicVisual

The media has video data.

Available in Mac OS X v10.3 and later.

Declared in `QTMedia.h`.

QTMediaCharacteristicAudio

The media has audio data.

Available in Mac OS X v10.3 and later.

Declared in `QTMedia.h`.

QTMediaCharacteristicCanSendVideo

The media can send visual data to another track.

Available in Mac OS X v10.3 and later.

Declared in `QTMedia.h`.

QTMediaCharacteristicProvidesActions

The media has actions.

Available in Mac OS X v10.3 and later.

Declared in `QTMedia.h`.

QTMediaCharacteristicNonLinear

The media is non-linear.

Available in Mac OS X v10.3 and later.

Declared in `QTMedia.h`.

QTMediaCharacteristicCanStep

The media can step.

Available in Mac OS X v10.3 and later.

Declared in `QTMedia.h`.

QTMediaCharacteristicHasNoDuration

The media has no duration.

Available in Mac OS X v10.3 and later.

Declared in `QTMedia.h`.

QTMediaCharacteristicHasSkinData

The media has skin data.

Available in Mac OS X v10.3 and later.

Declared in `QTMedia.h`.

QTMediaCharacteristicProvidesKeyFocus

Key events can be focused at the media.

Available in Mac OS X v10.3 and later.

Declared in `QTMedia.h`.

QTMediaCharacteristicHasVideoFrameRate

The media has a video frame rate.

Available in Mac OS X v10.3 and later.

Declared in `QTMedia.h`.

## Media Attributes

The following constants are keys for the media attributes that you can get and set using the [mediaAttributes](#) (page 8) and [setMediaAttributes:](#) (page 9) methods. To get or set a single attribute, use [attributeForKey:](#) (page 7) or [setAttribute:forKey:](#) (page 9).

```
NSString * const QTMediaCreationTimeAttribute;
NSString * const QTMediaDurationAttribute;
NSString * const QTMediaModificationTimeAttribute;
NSString * const QTMediaSampleCountAttribute;
NSString * const QTMediaQualityAttribute;
NSString * const QTMediaTimeScaleAttribute;
NSString * const QTMediaTypeAttribute;
```

### Constants

QTMediaCreationTimeAttribute

The creation time. The value for this key is of type NSDate.

Available in Mac OS X v10.3 and later.

Declared in QTMedia.h.

QTMediaDurationAttribute

The duration. The value for this key is of type NSNumber, interpreted as a QTime.

Available in Mac OS X v10.3 and later.

Declared in QTMedia.h.

QTMediaModificationTimeAttribute

The modification time. The value for this key is of type NSDate.

Available in Mac OS X v10.3 and later.

Declared in QTMedia.h.

QTMediaSampleCountAttribute

The media sample count. The value for this key is of type NSNumber, interpreted as a long.

Available in Mac OS X v10.3 and later.

Declared in QTMedia.h.

QTMediaQualityAttribute

The media quality. The value for this key is of type NSNumber, interpreted as a short.

Available in Mac OS X v10.3 and later.

Declared in QTMedia.h.

QTMediaTimeScaleAttribute

The media time scale. The value for this key is of type NSNumber, interpreted as a long.

Available in Mac OS X v10.3 and later.

Declared in QTMedia.h.

QTMediaTypeAttribute

The media type. The value for this key is of type NSString. See [“Media Types”](#) (page 10) for the values this attribute can return.

Available in Mac OS X v10.3 and later.

Declared in QTMedia.h.

# Document Revision History
