ScreenSaverDefaults Class Reference

Inherits from	NSUserDefaults : NSObject
Conforms to	NSObject (NSObject)
Framework	Library/Frameworks/ScreenSaver.framework
Availability	Available in Mac OS X v10.0 and later.
Declared in	ScreenSaverDefaults.h
Related sample code	MungSaver

Overview

ScreenSaverDefaults defines a set of methods for saving and restoring user defaults for screen savers.

Because screen savers are packaged as bundles and loaded by several different applications, it is not possible to use NSUserDefaults to store user preferences for them. ScreenSaverDefaults adds the method [defaultsForModuleWithName:](#) (page 5) to get an instance corresponding to a particular module name. Screen savers should typically use their bundle identifier as the module name. Once you have an instance of screen saver defaults, you can use the normal methods of NSUserDefaults to load, store, or modify values.

Tasks

Obtaining the ScreenSaverDefaults Instance

+ [defaultsForModuleWithName:](#) (page 5)

Returns a screen saver defaults instance that reads and writes defaults for the module *moduleName*.

Class Methods

defaultsForModuleWithName:

Returns a screen saver defaults instance that reads and writes defaults for the module *moduleName*.

+ (id)defaultsForModuleWithName:(NSString *)*moduleName*

Availability

Available in Mac OS X v10.0 and later.
