QTKit Functions Reference

Framework:	/System/Library/Frameworks/QTKit.framework
Declared in	QTTime.h QTTimeRange.h QTUtilities.h

Overview

This chapter describes the functions that are available in the QuickTime Kit framework.

Functions by Task

Creating QTTime Structures

The following functions are used to create QTTime structures.

[QTMakeTime](#) (page 8)

Creates a QTTime structure.

[QTMakeTimeScaled](#) (page 9)

Returns a QTTime structure.

[QTTimeFromString](#) (page 13)

Returns a QTTime structure.

[QTMakeTimeWithTimeRecord](#) (page 10)

Creates a QTTime structure.

[QTMakeTimeWithTimeInterval](#) (page 10)

Creates a QTTime structure.

Getting and Setting Times

The following functions are used to get and set times.

[QTGetTimeRecord](#) (page 7)

Returns the value of a QTTime structure expressed as a TimeRecord.

[QTGetTimeInterval](#) (page 7)

Returns the value of a QTTime structure expressed as an NSTimeInterval.

Comparing QTime Structures

The following function is used to compare `QTime` structures.

[QTimeCompare](#) (page 12)

Returns a value of type `NSComparisonResult`.

[QTSMPTimeCompare](#) (page 11)

Compares two `SMPTime` structures.

[QStringFromSMPTime](#) (page 11)

Returns a human-readable string from the `SMPTime`. The returned string is of the form `hh:mm:ss.ff`.

Adding and Subtracting Times

The following functions are used to add and subtract times:

[QTimeIncrement](#) (page 13)

Adds two `QTime` structures.

[QTimeDecrement](#) (page 12)

Subtracts one `QTime` from another.

Getting a Time Description

The following function is used to get a time description:

[QStringFromTime](#) (page 11)

Returns a description of a `QTime` structure.

Time Range Functions

[QTEqualTimeRanges](#) (page 7)

Returns YES if the specified time ranges are identical.

[QTIntersectionTimeRange](#) (page 8)

Returns a `QTimeRange` structure that represents the intersection of the two ranges.

[QTMakeTimeRange](#) (page 9)

Returns a `QTimeRange` structure initialized using the `QTime` structures `time` and `duration`.

[QStringFromTimeRange](#) (page 12)

Returns a description of a `QTimeRange` structure.

[QTimeInTimeRange](#) (page 14)

Returns YES if the specified time lies in the time range.

[QTimeRangeEnd](#) (page 14)

Returns a `QTime` structure representing the end of the specified time range.

[QTimeRangeFromString](#) (page 14)

Returns a `QTimeRange` structure

[QTUnionTimeRange](#) (page 15)

Returns a `QTimeRange` structure.

QuickTime Helper Functions

[QTStringForOSType](#) (page 11)

Returns an NSString representing the specified four-character code type.

[QTOSTypeForString](#) (page 10)

Returns a four-character code representing the specified NSString.

Functions

QTEqualTimeRanges

Returns YES if the specified time ranges are identical.

```
BOOL QTEqualTimeRanges (
    QTTimeRange range,
    QTTimeRange range2
);
```

Discussion

This function returns YES if the specified time ranges are identical.

Availability

Available in Mac OS X v10.3 and later.

Declared In

QTTimeRange.h

QTGetTimeInterval

Returns the value of a QTTime structure expressed as an NSTimeInterval.

```
BOOL QTGetTimeInterval (
    QTTime time,
    NSTimeInterval *timeInterval
);
```

Discussion

This function returns, in the location to by *timeInterval*, the value of a QTTime structure expressed as a NSTimeInterval. Returns YES if the method succeeded.

Availability

Available in Mac OS X v10.3 and later.

Declared In

QTTime.h

QTGetTimeRecord

Returns the value of a QTTime structure expressed as a TimeRecord.

```

BOOL QTGetTimeRecord (
    QTime time,
    TimeRecord *timeRecord
);

```

Discussion

This function returns, in the location pointed to by *timeRecord*, the value of a `QTime` structure expressed as a `TimeRecord`. Returns YES if the method succeeded.

Availability

Available in Mac OS X v10.3 and later.

Related Sample Code

QTAudioExtractionPanel

Declared In

QTime.h

QTIntersectionTimeRange

Returns a `QTimeRange` structure that represents the intersection of the two ranges.

```

QTimeRange QTIntersectionTimeRange (
    QTimeRange range1,
    QTimeRange range2
);

```

Discussion

This function returns a `QTimeRange` structure that represents the intersection of the two ranges. The intersection of two ranges is the largest range that includes all times that are in both ranges.

Availability

Available in Mac OS X v10.3 and later.

Declared In

QTimeRange.h

QTMakeTime

Creates a `QTime` structure.

```

QTime QTMakeTime (
    long long timeValue,
    long timeScale
);

```

Discussion

This function creates a `QTime` structure initialized using the scalar value `timeValue` and the time scale `scale`.

Availability

Available in Mac OS X v10.3 and later.

Related Sample Code

QTAudioExtractionPanel
 QTKitCommandLine
 QTKitCreateMovie
 QTKitMovieShuffler

Declared In

QTime.h

QTimeRange

Returns a `QTimeRange` structure initialized using the `QTime` structures `time` and `duration`.

```
QTimeRange QTimeRange (
    QTime time,
    QTime duration
);
```

Discussion

This function returns a `QTimeRange` structure initialized using the `QTime` structures `time` and `duration`. Those structures may have different time scales. In all cases, the time scale used in the new `QTimeRange` structure is that of `time`.

Availability

Available in Mac OS X v10.3 and later.

Related Sample Code

QTKitCommandLine
 QTKitMovieShuffler

Declared In

QTimeRange.h

QTimeScaled

Returns a `QTime` structure.

```
QTime QTimeScaled (
    QTime time,
    long timeScale
);
```

Discussion

This function returns a `QTime` structure whose time is set to the time of a `QTime` structure interpreted using the time scale `scale`.

Availability

Available in Mac OS X v10.3 and later.

Declared In

QTime.h

QTMakeTimeWithTimeInterval

Creates a `QTime` structure.

```
QTKIT_EXTERN QTime QTMakeTimeWithTimeInterval (
    NSTimeInterval timeInterval
);
```

Discussion

Creates a `QTime` structure initialized using the `NSTimeInterval` value *timeInterval*.

Availability

Available in Mac OS X v10.3 and later.

Declared In

`QTime.h`

QTMakeTimeWithTimeRecord

Creates a `QTime` structure.

```
QTKIT_EXTERN QTime QTMakeTimeWithTimeRecord (
    TimeRecord timeRecord
);
```

Discussion

This function creates a `QTime` structure initialized using the values in the time record *timeRecord*.

Availability

Available in Mac OS X v10.3 and later.

Related Sample Code

`QTAudioExtractionPanel`

Declared In

`QTime.h`

QTOSTypeForString

Returns a four-character code representing the specified `NSString`.

```
OStype QTOSTypeForString (
    NSString *string
);
```

Discussion

This function returns a four-character code representing the specified `NSString`.

Availability

Available in Mac OS X v10.3 and later.

Declared In

`QTUtilities.h`

QTSMPTETimeCompare

Compares two `SMPTETime` structures.

```
NSComparisonResult QTSMPTETimeCompare(SMPTETime time, SMPTETime otherTime)
```

QTStringForOSType

Returns an `NSString` representing the specified four-character code type.

```
NSString * QTStringForOSType (
    OSType type
);
```

Discussion

This function returns an `NSString` representing the specified four-character code type.

Availability

Available in Mac OS X v10.3 and later.

Declared In

`QTUtilities.h`

QTStringFromSMPTETime

Returns a human-readable string from the `SMPTETime`. The returned string is of the form `hh:mm:ss.ff`.

```
NSString* QTStringFromSMPTETime(SMPTETime time)
```

Availability

Available in Mac OS X v10.5 and later.

Declared In

`QTTime.h`

QTStringFromTime

Returns a description of a `QTTime` structure.

```
NSString * QTStringFromTime (
    QTTime time
);
```

Discussion

This function returns a description of a `QTTime` structure. The string is in the form `"sign:days:hours:minutes:seconds:timevalue:timescale"`, where `sign` is empty or `"-"`. Note that this is not for user input, but for archiving and debugging purposes.

Availability

Available in Mac OS X v10.3 and later.

Related Sample Code

`CIVideoDemoGL`

QTAudioExtractionPanel
 QTKitPlayer
 QTRecorder

Declared In
 QTTime.h

QTStringFromTimeRange

Returns a description of a `QTTimeRange` structure.

```
NSString * QTStringFromTimeRange (
    QTTimeRange range
);
```

Discussion

This function returns a description of a `QTTimeRange` structure. The string is in the form "hours:minutes:seconds.frames:: hours:minutes:seconds.frames". Note that this is for archiving and debugging purposes, not for user display.

Availability

Available in Mac OS X v10.3 and later.

Declared In

QTTimeRange.h

QTTimeCompare

Returns a value of type `NSComparisonResult`.

```
NSComparisonResult QTTimeCompare (
    QTTime time,
    QTTime otherTime
);
```

Discussion

This function returns a value of type `NSComparisonResult` that indicates the result of comparing a `QTTime` structure with the specified `QTTime` structure *otherTime*.

Availability

Available in Mac OS X v10.3 and later.

Related Sample Code

QTAudioExtractionPanel
 QTKitMovieShuffler

Declared In

QTTime.h

QTTimeDecrement

Subtracts one `QTTime` from another.

```
QTime QTimeDecrement (
    QTime time,
    QTime decrement
);
```

Discussion

This function returns a `QTime` structure whose time is set to the time of a `QTime` structure minus that of the structure *decrement*.

Availability

Available in Mac OS X v10.3 and later.

Related Sample Code

QTAudioExtractionPanel

Declared In

QTime.h

QTimeFromString

Returns a `QTime` structure.

```
QKIT_EXTERN QTime QTimeFromString (
    NSString *string
);
```

Discussion

This function returns a `QTime` structure whose time is set to the time expressed by the string; the string is assumed to be in the form "days:hours:minutes:seconds:frames/timescale".

Availability

Available in Mac OS X v10.3 and later.

Related Sample Code

QTAudioExtractionPanel

Declared In

QTime.h

QTimeIncrement

Adds two `QTime` structures.

```
QTime QTimeIncrement (
    QTime time,
    QTime increment
);
```

Discussion

This function returns a `QTime` structure whose time is set to the time of a `QTime` structure plus that of the structure *increment*.

Availability

Available in Mac OS X v10.3 and later.

Declared In

QTime.h

QTimeInRange

Returns YES if the specified time time lies in the time range range.

```
BOOL QTimeInRange (
    QTime time,
    QTimeRange range
);
```

Discussion

This function returns YES if the specified time time lies in the time range range.

Availability

Available in Mac OS X v10.3 and later.

Declared In

QTimeRange.h

QTimeRangeEnd

Returns a QTime structure representing the end of the specified time range.

```
QTime QTimeRangeEnd (
    QTimeRange range
);
```

Discussion

This function returns a QTime structure representing the end of the specified time range.

Availability

Available in Mac OS X v10.3 and later.

Declared In

QTimeRange.h

QTimeRangeFromString

Returns a QTimeRange structure

```
QTimeRange QTimeRangeFromString (
    NSString *string
);
```

Discussion

This function returns a QTimeRange structure whose range is set to the range expressed by string; the string is assumed to be in the form

"days:hours:minutes:seconds.frames/timescale~days:hours:minutes:seconds.frames/timescale".

Availability

Available in Mac OS X v10.3 and later.

Declared In

QTimeRange.h

QTUnionTimeRange

Returns a QTimeRange structure.

```
QTimeRange QTUnionTimeRange (
    QTimeRange range1,
    QTimeRange range2
);
```

Discussion

This function returns a QTimeRange structure that represents the union of the two ranges. The union of two ranges is the smallest range that includes all times that are in either range.

Availability

Available in Mac OS X v10.3 and later.

Declared In

QTimeRange.h

Document Revision History

This table describes the changes to *QTKit Functions Reference*.

Date	Notes
2009-05-06	Fixed and updated function listings. Minor fixes.
2006-05-23	First publication of this content as a separate document.
