- synchronization messages 4-20
- synchronizing sound channels 2-30 to 2-31, 2-95
- synchronizing sounds with other actions 2-51
- synthesizers. *See* speech synthesizers
- synthesizer-specific embedded speech command 4-29
- SysBeep procedure
 - described 1-35, 2-120 to 2-121
 - example use of 1-24
 - using as notification 1-25
- system alert sounds
 - determining status of 2-40 to 2-41, 2-137
 - disabling 2-40 to 2-41
 - editing list of 1-16
 - enabling 2-40 to 2-41
 - installing new sound 1-19
 - producing 1-24 to 1-25, 1-35, 2-120 to 2-121
 - setting status of 2-137 to 2-138

T

- text
 - conversion into phonemes 4-32 to 4-33, 4-79 to 4-80

- specifying allophones in 4-33
- text-done callback procedures 4-19, 4-82 to 4-84
- text processing modes 4-42
- TextToPhonemes function 4-33, 4-79 to 4-80
- text-to-speech. *See* Speech Manager
- 'thng' resource type 5-8 to 5-11, 6-5 to 6-7
- ticks, used to time system alert sounds 1-25
- timbre 2-8, 2-28, 2-96
- timbreCmd command 2-28, 2-96
- Time Manager, and synchronizing sounds 2-31
- totalLoadCmd command 2-95
- 'ttsd' resource type 4-91
- two's complement encoding 2-11

U

- uncompressed sound data. *See* decompressed sound data, noncompressed sound data
- unit table, installing sound input device driver into 3-13
- unsigned fixed-point numbers, multiplying and dividing 2-149
- UnsignedFixMulDiv function 2-149
- UseDictionary function 4-38, 4-81 to 4-82
- user interface guidelines, for sound 1-23 to 1-24
- utility components 5-6

V

- vers embedded speech command selector 4-29
- versionCmd command 2-95
- version embedded speech command 4-29
- version records 2-118
- version resources 2-35, 2-118
- 'vers' resource type 2-35, 2-118
- VoiceDescription data type 4-47
- voice description records 4-16, 4-47 to 4-48
- VoiceFileInfo data type 4-48
- voice file information records 4-48
- voice resources 4-89
- voices
 - characteristics of 4-6 to 4-9
 - counting 4-14, 4-64 to 4-65
 - defined 4-5 to 4-6
 - getting a description of 4-14, 4-66 to 4-67
 - identifying 4-14, 4-65 to 4-66
 - installing into sound channels 2-10, 2-43 to 2-45
 - synthesized 1-22
 - updating information about 4-66
- VoiceSpec data type 4-46
- voice specification records 4-46 to 4-47, 4-64

volm embedded speech command selector 4-29
volume
 See also amplitude, speech volume
 defined 2-8
volumeCmd command 2-31, 2-96
volume levels, controlling 2-31 to 2-32, 2-96 to 2-97,
 2-139 to 2-142
Volumes control panel 6-4 to 6-5
VOX recording 3-5, 3-25
VOX stopping 3-5, 3-25

W

waitCmd command
 described 2-94
 example of use 2-29
waveTableCmd command 2-44, 2-97
wave-table data 2-8
wave tables 2-8, 2-44
word callback procedures
 described 4-88 to 4-89
 example of 4-22
word prominence symbols 4-34
